

TULONGA MILAPO

Junior Full-Stack Developer | Backend Developer | PHP, Go, SQL & Linux

Choma, Zambia | +260 772 178 661 | +260 767 778 162 | tulongamilapo@outlook.com

GitHub: github.com/Tulonga | LinkedIn: linkedin.com/in/tulonga-milapo-a17925315

PROFESSIONAL SUMMARY

Junior full-stack and backend developer with practical experience building web applications, REST APIs, inventory tools, and data-tracking solutions using PHP, Laravel, Go, MySQL, React, and Linux-based development workflows. Led a three-person development team during a startup project, delivered freelance web solutions for small businesses, and developed automated inventory reporting tools that reduced reporting time by 40%. BSc (Hons) Computing graduate with strong Git, SQL, API testing, documentation, and problem-solving skills. Seeking a backend, full-stack, junior software developer, IT support, or Linux/sysadmin-support role.

EDUCATION

Bachelor of Science (Honours) in Computing (2:2) | University of Greenwich, delivered in partnership with ZCAS University – Lusaka, Zambia

Completed: February 2026

NCC Level 5 Diploma in Computing | ZCAS University – Lusaka, Zambia

Completed: 2024

NCC Level 4 Diploma in Computing | ZCAS University – Lusaka, Zambia

Completed: 2023

School Certificate, Grade 12 | Choma Secondary School – Choma, Zambia

Completed: 2021

TECHNICAL SKILLS

Backend development	PHP, Laravel, Go, REST APIs, CRUD applications, authentication, API design
Databases	SQL, MySQL, database design, Laravel migrations, query optimisation
Frontend development	JavaScript, React, Next.js, Tailwind CSS, HTML, CSS, responsive design
Systems and DevOps	Linux (Arch/Garuda), Bash scripting, Git, GitHub, CLI workflows, zsh, tmux
Tools	VS Code, Helix, Postman, Excel, LibreOffice Calc, GitHub
Development practices	Agile/Scrum, version control, debugging, technical documentation, requirements gathering
Other	C#, Node.js fundamentals, inventory and operational data analysis

PROFESSIONAL EXPERIENCE

Youth Centre Support / Technology, Sport and Music Department | Choma Youth Center – Choma, Zambia

July 2026 – Present

- Supported Youth Center activities and day-to-day operations in the Technology, Sport and Music Department.
- Assisted with administrative, communication, and technology-related tasks in a community-focused environment.
- Worked with staff, mentors, and young people, strengthening teamwork, stakeholder communication, and problem-solving skills.
- Contributed to organised record handling and operational support while working under time-sensitive requirements.
- Collaborated with a team to support a four-day youth camp, *Awakening the Sleeping Hearts of the Youth*, focused on youth motivation, mentoring, and empowerment.

Voter Verification / Inspection Personnel | Electoral Commission of Zambia – Simwami, Choma District, Zambia

March 2026 – One-week temporary assignment

- Assisted with voter-card verification activities in communities on the outskirts of Choma District.
- Helped members of the public confirm voter information and guided them through the verification process.
- Checked and handled voter information carefully, maintaining accuracy, professionalism, and confidentiality.
- Worked in a field-based setting and communicated clearly with community members and election personnel.

Operations Support and Inventory Specialist | Red Cherry Store – Lusaka, Zambia

January 2026 – February 2026

- Built an advanced Excel and LibreOffice Calc inventory workbook with formulas, dashboards, pivot tables, stock tracking, and sales reporting.
- Automated product and sales reporting for more than 100 SKUs, reducing reporting time by approximately 40%.
- Analysed sales and stock trends to support purchasing decisions, replenishment planning, and day-to-day operations.
- Improved the accuracy and accessibility of inventory information for non-technical business users.

Lead Developer, Backend / Full-Stack | MasterFees Startup – Lusaka, Zambia

June 2025 – September 2025

- Led a three-person development team in building full-stack web applications for startup clients.
- Developed backend features using PHP and Laravel and collaborated on frontend work using React, Next.js, and Tailwind CSS.
- Designed and maintained RESTful APIs supporting application workflows and daily transactions.
- Managed Git and GitHub workflows to support collaboration, version control, code review, and timely delivery.
- Improved database performance through query optimisation and Laravel migrations, contributing to faster application performance.

Freelance Backend / Full-Stack Developer | Self-Employed – Zambia

November 2023 – Present

- Developed custom web applications for small businesses using PHP, Laravel, MySQL, JavaScript, and responsive frontend tools.
- Built data-driven inventory and sales-tracking solutions to improve access to operational information.
- Created and integrated REST APIs for CRUD operations, data processing, and database-backed application features.
- Used GitHub repositories and version-control practices to manage code, revisions, and project delivery.
- Produced project documentation and user guidance to support adoption and handover.

SELECTED PROJECTS

Personal Inventory API | Go, PHP, SQL/MySQL, REST APIs

Ongoing | GitHub

- Building a RESTful API for book and inventory tracking using Go/PHP and an SQL database.
- Implementing CRUD functionality, search features, validation, structured data handling, and dashboard-ready endpoints.
- Demonstrates backend architecture, database integration, API testing, and scalable data-management concepts.

Dairy Co-operative Management System | MTN Hackathon Finalist | PHP, JavaScript, HTML, CSS 2023

- Developed a prototype system for dairy co-operative management during the MTN Hackathon.
- Implemented features for user authentication, inventory management, reporting, and record handling.
- Presented the solution to hackathon judges and received finalist recognition.

Red Cherry Inventory Dashboard | Excel / LibreOffice Calc

2025-2026

- Created an automated spreadsheet-based inventory dashboard for stock monitoring, product tracking, sales analysis, and reporting.
- Used formulas, pivot tables, dynamic dashboards, and stock-alert logic to make operational data easier to use.

KEY ACHIEVEMENTS

- Led a three-person software-development team during the MasterFees startup engagement.
- Achieved finalist recognition at the MTN Hackathon for a dairy co-operative management system.
- Built a stock and sales dashboard supporting more than 100 SKUs and reducing reporting time by about 40%.
- Delivered freelance full-stack applications using PHP/Laravel, MySQL, React, and Tailwind CSS.
